The pattern of intercalation is a 6 yrs - 6 yrs - 5 yrs - 5 yrs - 6 yrs within each 28 year set. The counting of the years begins with the year after an intercalation, and on the 5th or 6th year an intercalation will occur, depending where one is in the 28-year cycle.

The years listed are years upon which an intercalation will occur. This means that before beginning the year listed, one week of waiting that is not counted as part of the year is to be observed, and then the year is to begin.

Years with a negative sign (-) correspond to the year in B.C

Understanding Prophetic Days:

In prophecy, there are times declared in the measure of days relating to events in the prophecy being given, such as:

1260 days - Revelation 11:3, 12:6
1290 days - Daniel 12:11
1335 days - Daniel 12:12

Other references include:

1331 days - Ascension of Isaiah 4:12 (3 years, 7 months, 27 days)
1332 days - Ascension of Isaiah 4:14

All of which draw reference from Exodus 19-40, Deuteronomy 9-10, and Psalm 90.

While these days find fulfillment in their immediate, or smaller-scale, relationships to time, there is also a fulfillment of these prophecies as it relates to the whole of time. Therefore, they are called Prophetic Days, indicating that there is a keeping of time in the heavens that is above and independent of our luminary time-keeping pieces that has a correlation with time as we observe it through the time-keeping pieces of the luminaries as according to Genesis 1:14-19, and is independent of the notion of 1,000 years being equal to a day, or watch in the night, Psalm 90:4, 2 Peter 3:8, which present 1,000 years being equal to 1 day OR "a watch in the night" which is much shorter than a whole day. Thus, Psalm 90:4 and 2 Peter 3:8, which is quoting Psalm 90:4, and Revelation 20:1-10, are not stating a 1-to-1 equivalency, or direct mathematical equivalency, but are highlighting the timelessness of Yahuah; that "from everlasting to everlasting you are God", Psalm 90:2; that perfection is being numerically equated to 1,000.

The mathematical conversion from the Prophetic Days to Years is found in the intercalation of 5 weeks within a 28-year cycle, mathematically written as "28 years / 5 days". The reason the "5 weeks" can be written as "5 days" is this: One Week (1) can be written as "1 day of 7 days", similar to the prophetic language of "70 weeks of years" in Daniel 9:24-27. Since scripture defines one week as seven days, this equivalency allows for "35 days", which is also "5 weeks", to be written as "5 days of 7 days each". This is explained as follows:

In converting Prophetic Days to Prophetic Weeks, a multiplication of "1 week / 7 days" is done.

In converting Prophetic Weeks to Prophetic Years, a multiplication of "28 years / 5 weeks" is done.

In converting Prophetic Years to Years, a multiplication of "7 days / 1 week" is done. The actual units of measurement are "Years of Days / Week".

Prophetic days relate to the Years within the Week of Time. The "Years of Days" refers to the plain meaning of a year. The conversion from Prophetic Days to Prophetic Weeks is nullified, mathematically, by the conversion from Prophetic Years to Years. The "Week" in the denominator of the last conversion is a reference to time as a whole, representative of the week of creation in Genesis 1-2, and it is a week of 7 weeks, 2 Baruch 28:2. A week of 7 weeks means 1 week is equivalent to 1 day of 7 days, therefore 5 weeks is equal to 5 days of 7 days.

Therefore, utilizing "28 years / 5 days" instead of "28 years / 5 weeks" allows for skipping the conversion to Prophetic Weeks and Prophetic Years and to convert Prophetic Days to Years in one calculation due to the mathematical nullification and the equivalency of 1 week with 7 days allowing for 5 weeks to be written as 5 days of 7 days.
